Nothing protects like Ultragard

THE PROFESSIONAL'S CHOICE

Founded in 2016, Autotec has prided itself on delivering the market's leading automotive protection. In partnership with the leading automotive chemical manufacturer in Europe, with almost 40 years of proven excellence, we developed a next-generation Nano-Polysilazane coating engineered for the demanding Southeast Asian climate.

EXTERIOR PROTECTION

Ultragard is an incredibly tough barrier that bonds to and seals the entire exterior, not just the paintwork, providing exceptional gloss and long-term protection.

Enhanced with advanced nanotechnology, it forms a coating unlike anything else on the market. It cures to a true 9H hardness, the highest recognised standard, delivering extreme chemical and heat resistance with real-world durability that outperforms other premium coatings.

Its advanced hydrophobic properties repel dirt and water, significantly reducing acid rain watermarks. Over time, far fewer contaminants adhere to the surface, making it easier than ever to maintain a true 'as new' finish, for years to come.

It can also be applied to carbon fibre, vinyl wraps, decals and PPF. While it noticeably enhances gloss on painted surfaces, it protects pearl and matte finishes without adding unwanted shine, leaving all surfaces silky smooth to the touch.

WINDSHIELD PROTECTION

Autotec's advanced windscreen treatment delivers exceptional hydrophobic performance, improving visibility in heavy rain, day or night, while reducing watermarks and bug splatter.

DYE TRANSFER

ULTRAGARD NANO-POLYSILAZANE EXTERIOR PROTECTION

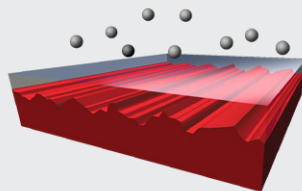

Unprotected Car Paint

If left unprotected, deterioration begins from day one. Harmful UV rays, acid rain and fall-out, will all start 'attacking' the paint.

Unprotected After 1 Year

The paint has started to oxidise and grime has started to accumulate in the paint, dulling the appearance and ageing the car.

Protected After 10 Years

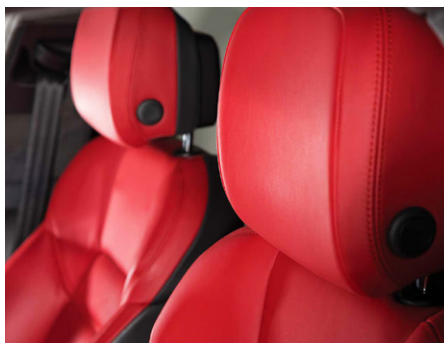

Ultragard chemically bonds to the paint and protects from day one. There has been no oxidation or discolouration of the surface.

AUTOTEC LEATHER PROTECTOR

For vehicles with leather interiors, Autotec's Leather Protector provides long-lasting protection to preserve and maintain the 'as new' look of leather seats and trims.

Treated surfaces are coated with an invisible, breathable barrier that helps prevent staining from spills and reduces dye transfer from clothing, making it ideal for light-coloured leathers.

Enriched with natural oils and advanced UV screening technology, it helps prevent fading while maintaining the original factory colour. The surface retains its matte finish and supple, 'as new' feel.

AUTOTEC FABRIC PROTECTOR

Once treated, there is no need to worry about spills. Autotec's advanced micro-resin formula forms a durable, invisible barrier around every fibre of seats and carpets, preventing liquids from penetrating the fabric and making surfaces effectively stain-proof and easy to clean. It also reduces friction between fibres, helping to prolong their life, maintain an 'as new' appearance, and prevent pet hair from becoming entangled in the fabric.

EXTERIOR FABRIC PROTECTION

The formula is also suitable for exterior use, delivering high-performance, weather-resistant protection for cabriolet soft tops exposed to the elements.

Autotec
— PROFESSIONAL —

AUTOTEC AFTERCARE

Autotec is proud to introduce a comprehensive range of best-in-class, professional-grade aftercare products, expertly formulated and manufactured in Great Britain.

They deliver superior performance and ease of use, far exceeding competing aftercare products.

Available now, ask here for details.

Ultragard is trusted, accredited, and partnered with dealerships of the following leading automotive brands.

Up to 10 Years of Guaranteed Protection

Unlike most coatings, Ultragard's professionally applied Nano-Polysilazane exterior coating chemically bonds to the surface. Its advanced formulation is so durable that it requires no reapplication and maintains your vehicle's appearance for the duration of the guarantee.

With annual participation in Autotec's Managed Programme, the Guarantee extends to 10 years. Without participation, a market-leading 5-year stand-alone guarantee applies.

Visit Autotec's website for more details.
